# Why ASUS Consumer Desktops?

## ASUS Desktops - Leading in Satisfaction with Reliability

ASUS computers reflect a tradition of the finest quality, innovation and longevity. Based on the PCWorld USA 2012 reader survey of tech satisfaction, reliability, and service, users ranked ASUS as a leading choice for desktop PCs, citing high satisfaction with their value, connectivity, ease of use and reliability. The survey also found ASUS desktop PCs were one of the most likely to be recommended to others.

## Do More at Once with Dual-core Processors Inside

The ASUS RT-AC68U features a dual-core processor that eliminates the performance drops that plague other routers. So even on the busiest home networks, HD video streaming is always smooth, the latency low for online gaming and VoIP calls, and file downloads are never interrupted.

## Dual-Band Connectivity for Lag-Free Entertainment

Delivering 2.4 GHz and 5 GHz concurrent bands at up to 600 Mbps and 1300 Mbps, respectively, the RT-AC68U has a total speed of up to 1900 Mbps, and maintains complete stability. You can perform basic tasks like Web browsing and file downloading on the 2.4 GHz band, while simultaneously allowing multiple devices to stream in Full HD or support online gaming and other bandwidth-demanding applications smoothly on the clearer 5 GHz band.
