# ASUS BIOS Configuration Tool

## Simplify and enhance BIOS customization capabilities

The ASUS Configuration Tool (ACT) is a powerful solution for enhancing BIOS customization capabilities on multiple devices and upgraded integrations with third-party UEM solution providers
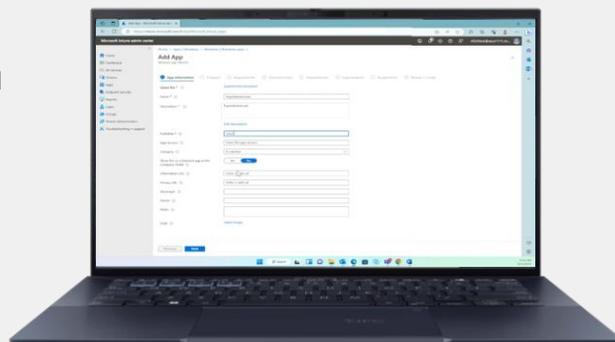

## Effortlessly customize BIOS settings even with just basic knowledge and tools

### BIOS Snapshot with High Level of Mobility
Reads the current device BIOS settings and exports as a JSON file, which can be imported to other devices in its entirety.

### Easy BIOS Modification without Specialized Tool
Edit device BIOS settings with any text editor that supports .json file formats.

# Why ASUS Configuration tool?

### Simple
Easily configure BIOS settings across multiple devices from a single, unified interface

### Secure
Use the Trusted App-based BIOS admin password setting to protect against unauthorized access

### Efficient
Customize BIOS settings without the need to flash the BIOS, and use the command line interface (CLI) for faster configuration

## Feature and benefits
Comprehensive and Effortless IT Management
