

ASUS MIL-STD 810H Test Report - L1400

Test Category	Test Method	MIL-STD-810H Test Parameters	Test Result
Altitude Storage/ Air Transport	Method 500.6-Procedure I	Test Pressure: Equivalent to cabin altitude of 40,000ft	
		Temperature: -20°C	D
		Duration:12 hour	Pass
		Unit is non-operational during test.	
	Method 500.6-Procedure II	Test Pressure: Equivalent to cabin altitude of 15,000ft	Pass
Altitude Operation/Air Carriage		Temperature: 5°C and 40°C	
		Duration: 12 hour (5°C) and 12 hour (40°C)	
		Unit is operational during test.	
	Method 501.7-Procedure II (A1)	Duration: 3 day exposure (3 X 24 hr. cycles)	Pass
High Temperature Operational (Hot Dry)		Temperature: 32~49°C cycling temperature exposure	
		Table 501.7-III-Procedure. High temperature cycles, climate category A1 Hot Dry	
		Unit is operational during test.	
	Method 501.7-Procedure I (A1)	Duration: 7 day exposure (7 X 24 hr. cycles)	
High Temperature Storage and Transit (Hot Dry)		Temperature: 33~71°C cycling temperature exposure	
		Table 501.7-III-Procedure. High temperature cycles, climate category A1 Hot Dry	Pass
, ,,		Unit is non-operational during test.	Dage
		Duration: 3 day exposure (3 X 24 hr. cycles)	
		Temperature: 30~43°C cycling temperature exposure	
High Temperature			
Operational (Basic Hot)	Method 501.7-Procedure II (A2)	Table 501.7-II-Procedure. High temperature cycles, climatic category A2 - Basic Hot	Pass
		Humidity: 14~44%	
		Unit is operational during test.	
		Duration: 7 day exposure (7 X 24 hr. cycles)	
High Temperature		Temperature: 30~63°C cycling temperature exposure	D
Storage and Transit (Basic Hot)	Method 501.7-Procedure I (A2)	Table 501.7-II-Procedure. High temperature cycles, climatic category A2 - Basic Hot	Pass
		Humidity: 5~44%	
		Unit is non-operational during test.	
		Duration: 7 day exposure (7 X 24 hr. cycles)	Pass
Low Temperature	Method 502.7- Procedure I (C1)	Temperature: -25~ -33°C	
Storage and Transit (Basic climatic)		Low temperature cycles, Table IX. Basic climatic_C1	
		Unit is non-operational during test.	
	Method 502.7- Procedure II (C1)	Duration: 3 day exposure (3 X 24 hr. cycles)	Pass
Low Temperature		Temperature: -21~ - 32°C	
Operational (Basic climatic)	meanou 302ii Troccuure ii (e.)	Low temperature cycles, Table IX. Basic climatic_C1	
		Unit is operational during test.	
		Duration: 7 day exposure (7 X 24 hr. cycles)	Pass
Low Tompovotuvo		Temperature: -37~ -46°C	
Low Temperature Storage and Transit (Cold climatic)	Method 502.7- Procedure I (C2)	Low temperature cycles, Table XI. Cold climatic_C2	
		Wind speed less than 5m/s(11mph)	
		Unit is non-operational during test.	
		Duration: 3 day exposure (3 X 24 hr. cycles)	
Low Temperature Operational (Cold climatic)	Method 502.7- Procedure II (C2)	Temperature: -37∼ -46°C	Pass
		Low temperature cycles, Table XI. Cold climatic_C2	
		Wind speed less than 5m/s(11mph)	
		Unit is operational during test.	
Humidity Aggravated Cycle	Method 507.6- Procedure II	Duration:10 Days	Pass
		Temperature: 30°C and 60°C	
		Humidity: 95% RH, constant	
		Unit is non-operational during test.	
	Method 514.8- Procedure I (Table514.8C-I)	Frequency 10-500Hz, Vertical rms = 1.04 g	
Vibration		Transverse rms = 0.02g, Longitudinal rms = 0.74g	Pass
		Test Time: 60 minutes per axis (US highway truck vibration exposure)	
	Method 514.8- Procedure I (Table514.8C-IV)	Frequency 5-500Hz, Vertical rms = 4.43 g	
		Transverse rms = 1.30g, Longitudinal rms = 2.86g	Pass
		Test Time: 32 minutes per axis	
	Method 514.8- Procedure I (Table514.8C-VII)	Frequency 5-500Hz, Vertical rms = 2.24 g	Pass
		Transverse rms = 1.48g, Longitudinal rms = 1.90g	
		Test Time: 40 minutes per axis	
		rest filler to fillindies per dats	

Shock	Method 516.8- Procedure I	Functional Shock	Pass
	Method 310.6- Flocedure i	Operational 3 shocks/axis/direction for a total of 18 shocks; 40 Gs peak, 11 ms	F 0.55
		Bench Handling	
	Method 516.8- Procedure VI	(Drop Height : 100 mm)	Pass
		Unit is operational during test.	

1. The ASUS testing regimen is not a guarantee of future performance under the specified test conditions. Damage occurring under these test conditions would be considered accidental, and would not be covered by the standard ASUS warranty. Additional cover is available with the ASUS Accidental Damage Protection care pack.

2. MIL-STD-810 testing is conducted on selected ASUS products only. These tests are not intended to and do not demonstrate fitness for US Department of Defense (DoD) contract requirements or for military use. Test results are not a guarantee of future performance under the specified test conditions. Damage occurring under these test conditions would be considered accidental, and would not be covered by the standard ASUS warranty. Additional cover is available with the ASUS
